

WENDY KELLY

PHYSICAL WORK

when I came in 1980, there was a definite difference and I worked on the work floor. I was not a confidential secretary at the time. And, I was treated differently because the job area where I worked was predominantly male. So, we had to take in bags and, um, take things off the truck-mail off the truck. So, when we would ask for assistance, we were told, "Well, you were hired just like me, so you have to do just like I do." So, you-so, it was not discrimination; you were just told that, "You were hired based on your qualifications, not because of your gender. So, you must do everything that I do."
