DISCRIMINATION

One of the things that I learned was, because I was a woman, I was overlooked in becoming a supervisor. And overlooked for being paid as a supervisor although I was the active supervisor for years. And the males, who had, like, only acted three or four months, were receiving pay as a supervisor. And I had been doing it for two years and had never received pay. And facility manager in charge told me he just never thought about it. He said he knew I was doing the job and he just never occurred to him to pay me.
